The 25-second bar

This thin line at the top counts 25 seconds. It's so subtle your customer barely notices it.

HOW YOUR CUSTOMER EXPERIENCES IT

Switch apps, and the bar stops.

If your customer leaves your brochure for another app or tab, the 25-second bar **pauses right where it is**. It carries on only when they come back.

- No view is counted while your brochure is in the background
- You pay only when someone actually looks for 25 seconds
- Every counted view shows live in your dashboard

- Send an enquiry in seconds
